STATEMENT OF SUBSTANCE OF INTERVIEW

Sir:

In response to the requirement in 37 C.F.R. §1.2, 37 C.F.R. §1.133, and MPEP §713.04, that Applicants provide a statement of the substance of an interview, Applicants hereinbelow submit the following summary.

Applicants gratefully acknowledge SPE Gart and Examiner Crawley for courtesies extended during the telephone interview including co-inventor Dr. Wu on January 15, 2009, for the above-referenced Application.

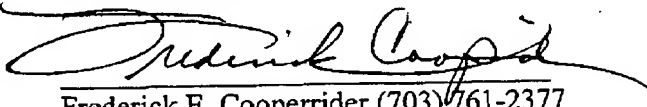

Concerning the substance of the interview, Applicants explained the present invention, including the aspect that the claimed method can be considered as "reverse" from the conventional method in that the region breakdown (e.g., the shingles) occurs for the query, not the contents of an underlying database, and then there is an indexing between the shingles of the queries and moving objects.

SPE Gart and Examiner Crawley indicated that they thought they understood the intended meaning of the claimed invention and would contact Applicants' representative, at the number below, if they had any additional technical questions or could offer some claim language considered to more precisely define the claimed invention.

Respectfully submitted,

Date:

01/15/09
